Minimum Yield - various SAE, ASTM and New Domestic versions

Thickness .052 min up to grade 60 class 2

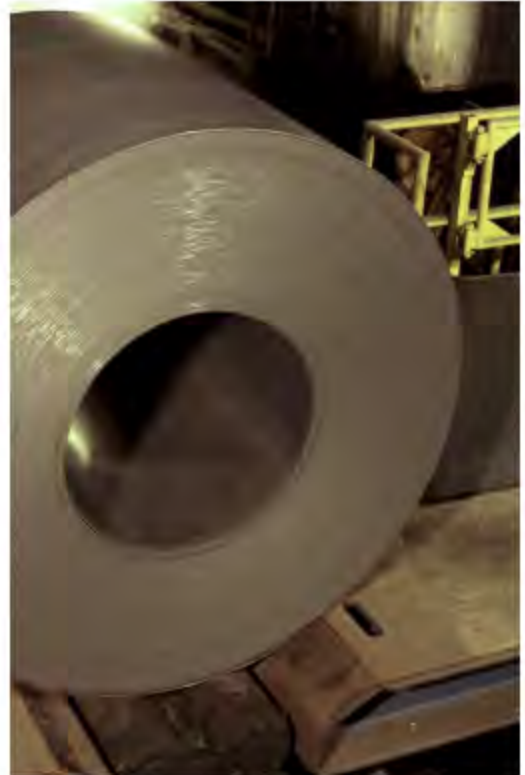

.075 min grade 60 class 1 and above

Width 41.55-61.5

Max gauge varies by grade

Max width varies by gauge

Coil Weight Max 1000 PIW

Please contact a North Star BlueScope LLC sales representative for specific gauge and width limitations at 1-888-822-2164.

Our Mission...Our Company

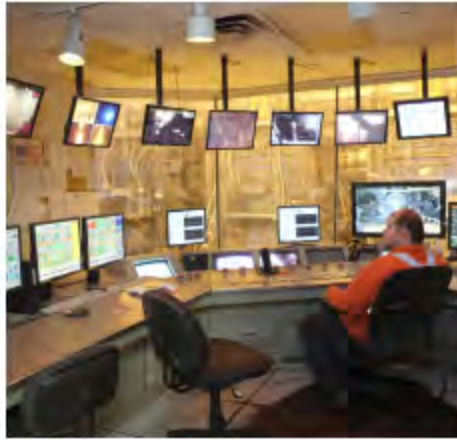

Mission

To be the preferred supplier in the steel industry by being the benchmark for safety, quality, service and on-time delivery.

Company

North Star BlueScope is owned by BlueScope, based in Melbourne, Australia. BlueScope is a flat steel producer for the domestic Australian, New Zealand and North American markets and is a leading international supplier of steel products and solutions principally found in the global building and construction industry.

Quality

Our medium thickness slab allows us to provide our customers with a hot band that has superior surface and formability characteristics. Our state of the art rolling mill transforms our slab into a hot rolled coil with excellent gauge and shape control.

Delivery

North Star BlueScope is the industry leader in on-time delivery performance. We schedule our mill to meet the delivery date promised – plain and simple!

Service

With one location, one product and an organization dedicated to taking care of our customers, our service to our customers is outstanding. Our customer friendly website (www.nsbsl.com) allows customers 24/7 access to open order status, gauge/width charts, and mill certifications.

Safety

North Star BlueScope Steel is committed to the safety and health of our employees, contractors and visitors. Safety is our core value and our highest priority. This is reflected in our daily operations. We utilize a behavior based safety culture, extensive incident reporting, safety conversations and audits to continuously make North Star BlueScope Steel a safe place to work.
